

ECS Electronics is an internationally operating company with offices in the Netherlands, Vietnam, the United Kingdom and Switzerland. The head office is located in Breda. Characterized by an informal corporate culture and with more than 30 years of experience, this family business has developed into the European market leader in the field of towbar wiring. From production locations in the Netherlands and Vietnam, more than 20 of the largest automotive brands are supplied all over the world.

**Do you want to be part of this fast-growing company with big ambitions?
Then we are looking for you!**

LOGISTIC PLANNER

JOB DESCRIPTION

The logistics planner ensures an efficient and accurate internal and external flow of goods for the orders to be delivered, Thinking of:

- transport between suppliers and ECS companies
- transport between different ECS (production) companies;
- Internal transport movements;
- transport between ECS and customers;

An accurate processing of the associated transactions in the existing ERP package, with the associated documents, are therefore part of the core tasks within this function.

TASKS

- Establishing the right priorities derived from the departmental objective(s) and customer expectations;
- Conducting research into opportunities for improving the logistics organization in the areas of inbound, storage, outbound, transport and customs;
- Ensuring the delivery of goods in accordance with quality guidelines;
- Ensuring timely information about the status of transport orders;
- Meeting established performance indicators, laid down in departmental and/or personal objectives, including monitoring and safeguarding the quality of organized transports by ECS Electronics;
- Conducting 'contract negotiations' and price negotiations with (potential) logistics partners for ECS, in order to submit these for approval to the operations manager;
- Periodically conducting tenders for various forms of transport;
- Carrying out (or having carried out) customs matters in collaboration with our logistics partners;
- Ensuring that work is carried out in accordance with:
 - Established quality standards;
 - Safety guidelines;
 - Environmental manual (NEN - EN - ISO 14001);
- Advisory role (key user) in changes, adjustments or extensions of ERP systems (Infor LN) or other control systems (barcode application, etc.).

DESIRED SKILLS AND KNOWLEDGE

- HBO education in a logistics direction;
- Knowledge of relevant and applicable Quality requirements, applicable for the Logistics department;
- Knowledge of Office applications, further Excel knowledge is a plus;
- Knowledge of and experience with logistics and administrative systems and MRP / ERP packages, preferably Infor LN;
- Customs knowledge, is a pre;
- Proficiency in Dutch;
- Proficiency in English;
- Proficiency in German, is a pre;
- Excellent communication skills;

OUR OFFER

- Varied position in an international environment
- Market-conform salary
- Secondary employment conditions
- 27 vacation days per year with full-time employment
- Good career and growth opportunities
